Subject: Update on the EA Report for Exploration Drilling on EL 2407 (2009-105)

Elizabeth,

As requested, EC has reviewed the environmental assessment update for the above project, received on April 24, 2009. We do not have any comments or concerns with regards to the content of this report.

However, as you may recall, there were three issues identified during the environmental assessment (EA) review that were subject to additional discussions between the CNSOPB, EC and the Agency following the completion of the 2005 Comprehensive Study Report. The CNSOPB committed to addressing these issues in a letter from E. Theriault to I. Travers, dated May 10, 2005. An update from the CNSOPB outlining how these commitments have been, or will be met, prior to the commencement of the project would be helpful in completing this portion of the EA.

We look forward to your response and if you have any questions please do not hesitate to contact me or Steve Zwicker (426-0992).

Sincerely,

Jayne Roma
