Hi Eric,

Thanks for the opportunity to review the PFC Installation and Deep Panuke Field HUC EPP/EEMP. Please find below comments/questions from DFO.

In general, DFO is satisfied with the standard mitigation measures provided in the EPP.

Section 1.2.1. The third bullet states that pressure testing and dewatering of the GEP and flowlines will take place. Where and how will dewatering of the GEP occur?

Regards, Donald

Hello Jayne and Donald:

Please find attached, for your review and comment, EnCana's EEM/EEMP for PFC Installation and Deep Panuke Field Hook Up Commissioning. The program is tentatively scheduled to begin early July. Therefore, may I have your comments by June 13th, 2011.
