**Subject:** RE: 2011 Rock Placement EPP/EEMP (2005-295B2)

Eric,

EC has reviewed the Rock Placement EPP/EEMP. The comments below, offered on the two previous EPP/EEMPs, are applicable (unless there is no incinerator onboard the vessel).

Jayne Roma

**Cc:** Humphrey, Donald; Roma, Jayne [Dartmouth]; Document Control  
**Subject:** Umbilical Installation EPP/EEMP

Marielle:

13/05/2011

The review of the Umbilical Installation EPP/EEMP has been completed. Environment Canada, and Fisheries and Oceans Canada also participated in the review. The following comment are a result of the review:

Air Quality

- It is requested that EC be notified when activities around the platform start and end for purposes of the Sable Island Air Monitoring Program.

Marine Birds:

- It is requested that EC be notified when nearshore survey activities start (within 22 km of Country Island).
- During the review of the subsea asset survey EPP/EEMP, a number of changes were recommended regarding oiled bird response measures (Therault to Thillet email, April 26, 2011). These recommendations remain applicable to the above-referenced EPPs.
