CANADA-NOVA SCOTIA
OFFSHORE PETROLEUM BOARD

Chief Safety Officer Decision

Decision Date: 08 September 2015
Applicant: Stena Drilling Ltd.
Reference: RQ-A4, Portable Electrical Tools Standard
Project: Shell Canada - Shelburne Basin Venture Exploration Drilling Project
Installation Name: Stena IceMAX
Authority: Canada-Nova Scotia Offshore Petroleum Resources Accord Implementation Act (Federal version), Section 210.07(1)
Regulation: Canada-Nova Scotia Offshore Marine Installations and Structures Occupational Health and Safety Transitional Regulations, Section 190

Decision:

Stena Drilling Ltd. has requested acceptance of portable electrical tools certified to a standard other than CSA Standard C22.2 No. 60745-2 as required in Section 190 of the regulation. The rationale for such a deviation is that certification to the International Electrotechnical Commission (IEC) standard 60745-2 provides an equivalent level of safety.

The workforce has been consulted and considers Stena's request acceptable. No concerns were identified during the public comment period.

The Certifying Authority concurs that the proposal meets the requirements of Certificate of Fitness Regulations Section 4(2)(a)(ii).

The Chief Safety Officer is satisfied that the protection of the health and safety of employees is not diminished by these arrangements, and hereby grants a deviation from Section 190 of the regulation.

Robert Normore, B.Tech., CRSP
Chief Safety Officer
