CANADA-NOVA SCOTIA
OFFSHORE PETROLEUM BOARD

Chief Safety Officer Decision

Decision Date: 06 November 2017
Applicant: Noble Drilling Services (Canada) Corporation
Reference: NRA-2017-CN-013, Platform Construction
Project: Sable Offshore Energy Project
Installation Name: Noble Regina Allen
Authority: Canada-Nova Scotia Offshore Petroleum Resources Accord Implementation Act (Federal version), Section 155(1)(a).
Regulation: Nova Scotia Offshore Petroleum Installations Regulations, Section 62(1)(a)

Decision:

Noble Drilling Services (Canada) Corporation has requested a deviation from Section 62(1)(a) which requires a platform to be fabricated and constructed in accordance with a specified Canadian Standards Association (CSA) reference document.

Acceptance of the deviation is based on the rationale that the Noble Regina Allen is fabricated and constructed in accordance with 2009 IMO MODU Code and 2008 ABS MODU Rules, with consideration of representative marine environment conditions and temperatures.

The Certifying Authority concurs that the proposal meets the requirements of Certificate of Fitness Regulations Section 4(2)(a)(ii).

The Chief Safety Officer hereby grants a deviation from Section 62(1)(a) of the Installation Regulations, and is satisfied that these arrangements provide an equivalent level of safety to that provided by the Regulations.

Robert Normore, B.Tech., CRSP
Chief Safety Officer
