**CNSOPB Geoscience & Resource Management Studies 2023 – 2025**

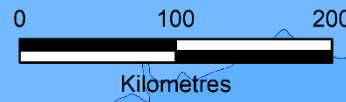

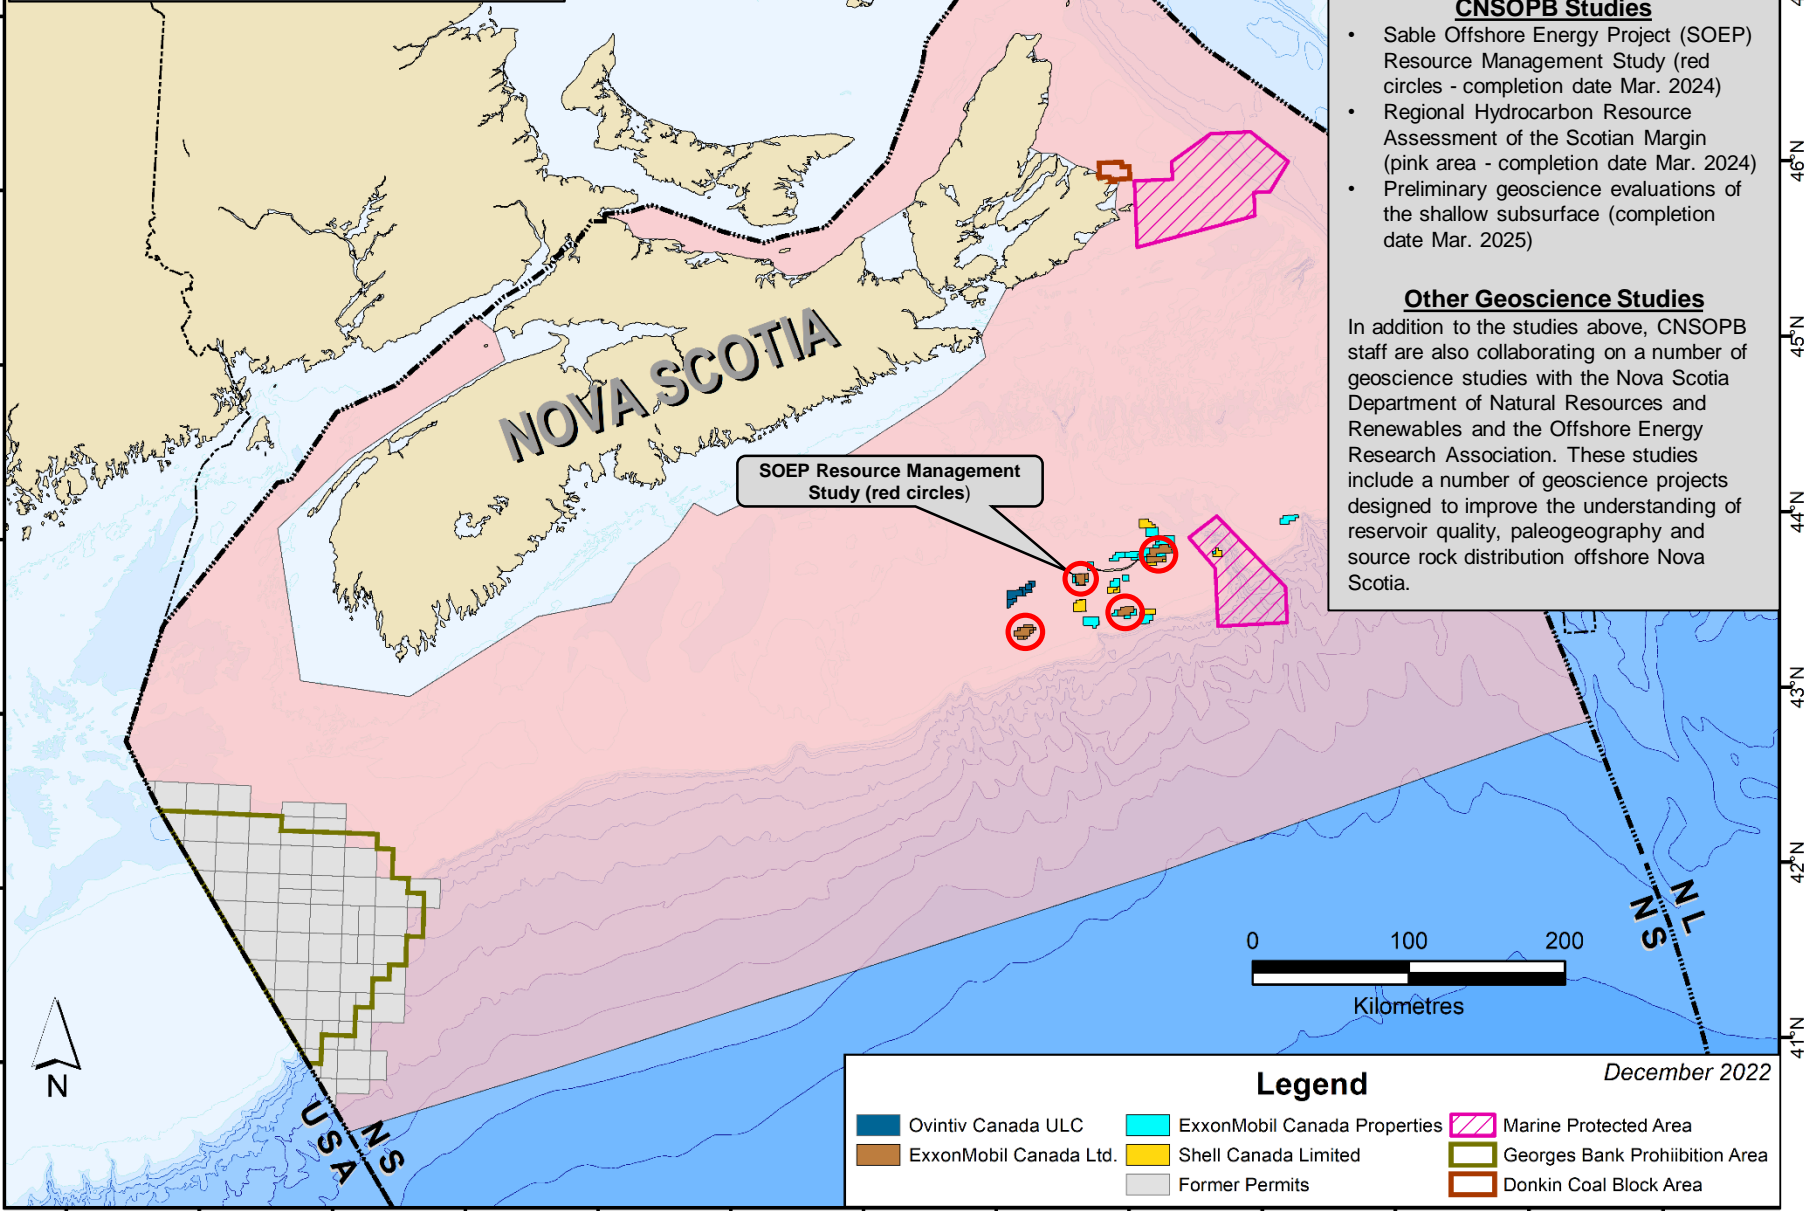

**CNSOPB Studies**

- Sable Offshore Energy Project (SOEP) Resource Management Study (red circles - completion date Mar. 2024)
- Regional Hydrocarbon Resource Assessment of the Scotian Margin (pink area - completion date Mar. 2024)
- Preliminary geoscience evaluations of the shallow subsurface (completion date Mar. 2025)

**Other Geoscience Studies**

In addition to the studies above, CNSOPB staff are also collaborating on a number of geoscience studies with the Nova Scotia Department of Natural Resources and Renewables and the Offshore Energy Research Association. These studies include a number of geoscience projects designed to improve the understanding of reservoir quality, paleogeography and source rock distribution offshore Nova Scotia.

SOEP Resource Management Study (red circles)
